

8601 PLD Medium Single

PLD Medium Single Ceiling mount The ceiling mount PLD Medium Single is suitable for single screens with a screen diagonal of 32 – 49“ | 81 – 124 cm. The screen can electively be mounted in landscape or portrait format. The VESA standards up to max. VESA 400 x 400 mm are supported. Thanks to the included tilt module, the mount can also be used on ceilings with an incline, 0 – 90° are possible here. The VESA mount can be tilted continuously from -5 to +15° and can also be swiveled ±30°. The variable ceiling extension can be telescoped and thus allows a ceiling distance between 920 – 3000 mm (center of screen). Thanks to a clever access system, the cabling disappears inside the mount. The surface of the ceiling mount is finished with an impact and scratch resistant powder coating in black. The max. load is 50 kg.
