

HA-20R

Powerful 20-Watt solid-state guitar amplifier, ideal for practice, small gigs and home recording. 2 full-featured channels offering everything you need from sparkling cleans to super-fat high-gain overdrive. Revolutionary VTC (Virtual Tube Circuit) technology, reproduces real tube-like tone, touch and feel. Powerful 3-band EQ with bass, middle and treble provides unbridled tone shaping for dialing in any sound you need. Clean channel with independent level control ranges from pristine sparkle to fat warmth, perfect for recapturing vintage tones, modern cleans or use as a pedal platform solution. Overdrive channel with independent gain and level controls ranges from vintage drive to modern high-gain saturation, ideal for lead, rock and metal tones. Real spring reverb with adjustable level control. Custom 8" Bugera speaker with vintage voicing for classic sound reproduction. Headphone output with integrated speaker simulation for perfect practice sessions without disturbing the neighbors. Auxiliary input for music playback from external devices to jam along with your favorite music. Dedicated line out with integrated speaker simulation for connecting direct to a PA or recording interface.
