

MIC300

he MIC300 is perfect for studio and live applications. The balanced ¼" TRS and gold-plated XLR inputs and outputs give you maximum flexibility in either scenario. It derives its personality from a hand-selected 12AX7 tube with UTC (ULTRA-TUBE circuitry) technology for superior tube character and low-noise operation. The MIC300 is ideally-suited for use with standard digital recorders and sound cards, imbuing signals with the warmth, presence and classic tube-compression that will bring your digital tracks to life.
