VOICELIVE PLAY

TC HELICON

Renowned TC-Helicon Vocal Effects, Harmony and Looping. Hundreds of song & artist inspired presets. RoomSenseTM mics guide your harmonies to the music around you. Producers spend more time on perfecting vocals than any other instrument; the number of layered vocal tracks on a studio recording often run well into the double-digits. VoiceLive Play makes this studio magic available to every singer - everywhere. Automatic backing harmonies, vocal double tracking, pristine EQ and compression, lush reverbs, hard-tuned robo-voice – all the goose-bump effects that make today's Billboard hit vocals truly stand out are yours. Access your effects directly, choose the presets you want and find the styles you like. Easily browse hundreds of preset sounds. Add dazzling effects for the chorus, or strip it down for the verse, you decide. Dedicated outputs for your voice – plus inputs for head phones, auxiliary devices, an expansion pedal and USB for updates and new presets.
