PLATFORM D2

Modular LCD display for the Icon Platform M and Platform X control surfaces, for extra channel parameter viewing options when mixing with the eMotion LV1 mixer. Platform D2 installs easily to your Platform M or X controllers. The large tilt-able backlit LCD display makes it easier to monitor channel control values, plugin parameters and more. You can view one parameter on Platform D2, while viewing other parameters on your computer screen – or you can create more flexible setups, freeing you to position the main computer screen wherever you want relative to your Icon Platform faders
