

DJM-V10-LF

**Pioneer Dj**

The DJM-V10-LF features new, longer channel faders with optimized curves and a new custom-designed curve preset to enable you to perform smooth and accurate mixes. The 60 mm shaft slide faders enable you to control the volume of the audio source from each channel precisely. What's more, a brand-new fader curve setting has been added to the unit and the faders have been appropriately weighted to enhance the potential offered by their elongated range. All the other features and specifications of the DJM-V10-LF are the same as the DJM-V10, which has become popular with the most creative DJs since its release in early 2020. The 6-channel unit is loaded with unique features and produces warm audio with energy and presence.
