

HA-10G

Powerful 10-Watt solid-state guitar amplifier, ideal for home use and practice. 2 full-featured channels offering everything you need from sparkling clean to super-fat overdrive and everything in between. Revolutionary VTC (Virtual Tube Circuit) technology reproduces real tube-like tone, touch and feel. Powerful 3-band EQ with bass, middle and treble provides unbridled tone shaping for dialing in any sound you need. Clean channel with independent level control ranges from pristine sparkle to fat warmth, perfect for recapturing vintage tones. Overdrive channel with independent gain control with vintage drive and clipping on tap. Custom 6" Bugera speaker with vintage voicing for classic sound reproduction. Headphone output with integrated speaker simulation for perfect practice sessions without disturbing the neighbors. Auxiliary input for music playback from external devices to jam along with your favorite music.
