

X4L DSP+ETH

The X4L has been designed to deliver the output voltage required by the latest generation of high-performance loudspeakers. The power supply is suitable for Single Phase, Bi-Phase or Three Phase operation from 85 VAC up to 460 VAC without the need of selection. True Three Phase load balancing is directly achievable without any complex load assignment in the power distribution system. Powersoft X4L provides four fully processable channels and selectable inputs from analog sources as well as digital AES3 and two redundant Dante™ streams. Channel mixing and routing can be easily performed thanks to the integrated low latency DSP, providing the highest degree of freedom in sound shaping and speaker management.

Manufacturer Name:	POWERSOFT
Model:	X4L DSP+ETH
Part Number:	PF000420
Channels	Four Channel
Resistance ohms	8Ω / 4Ω / 2Ω
DSP	Yes
Power (8 ohms/Watt RMS) per channel	4800
Power (4 ohms/Watt RMS) per channel	6800
Power (2 ohms/Watt RMS) per channel	8200
Application	Concert, Installation
Weight (kg)	15
	Rental
	5/3/2021
	4/6/2021
Guarantee	4 Years Guarantee
