

1918 Floormount OM55N-D

Floormount OM55N-D Floor mounting system specifically for Samsung OM55N-D The Samsung OMN-D Series (ultra-high-brightness displays) are specifically designed to be used in bright sunlight, like you find it in shop windows. Today modern shopping centers and also shop windows are small worlds of experience, which are visually upgraded with video- or animation-based promotional content. The Floormount OM55N-D is a stand system designed specifically for these thin 55" screens of the innovative digital signage series. The system is bolted directly to the floor for maximum stability. The required space the base plate needs is W 970 x D 240 mm. It can be positioned close to the window due to the small depth. The cable routing takes place within the frame and the two columns. This ensures a clean cable management. The bracket is black and finished with a scratch and impact resistant powder coating
