

CDJ-3000

**Pioneer Dj**

Pioneer DJ went back to the drawing board to make the CDJ-3000 digital DJ media deck the best-sounding and best-feeling DJ player they've ever created. Thanks to a cutting-edge micro-processing unit, sound quality and system stability are better than ever. You now have a total of eight Hot Cue buttons for on-the-fly triggering, while hardware buttons for Beat Jump and Key Sync functions give you even more creative performance potential. The jog wheel has been re-designed for the smoothest performance possible, and now touch latency is lower than ever for a truly seamless performance feel. Wrap it all up with a larger, brighter touchscreen display, and it's clear the Pioneer DJ CDJ-3000 is the most advanced professional DJ media player the company has ever created.
