SGS1

Ideal for live and studio mixing, this powerful DSP unit will free up your computer and let you run high plugin counts in real time and super-low latency. With SoundGrid Server One, you can mix and track with as many as hundreds of plugins at a time and be as creative as you want to be, without limiting yourself to the processing capabilities of your computer. Housed in a rugged, road-ready rack-mountable 2U chassis, SoundGrid Server One is a serious upgrade to any live or studio system, enhancing your plugin processing power session after session, night after night.
