

Full size, passive 3-way line array element for touring and installation applications. Dual 12" low frequency transducers with lightweight neodymium motors. 2 x 1.4" coaxial neodymium mid-high compression drivers. Integral Dendritic Plane Wave Transformer (DPWT) waveguides for perfect line source coupling in the vertical plane. 980 Watts continuous, 3,920 Watts peak power. 100°x 5° curvature. 3 way bi-amplified operation. Seamless integration with Lab Gruppen amplifiers and Lake DSP for a complete system solution. Advanced linear phase FIR hybrid processing for exceptional sound quality. 3-point suspension system with advanced ergonomic design for extremely rapid deployment and ease of use. Suspend up to 16 MV212 elements at 10:1 safety factor. Weather-resistant enclosure construction with durable semi matte black paint finish. Tour grade Neutrik SpeakON® STX NL4 connectors for input and link connection.
