

CP3000S

The CP3000S is not only the first Precision Series amplifier to use a switch-mode power supply, but also the first switch-mode amplifier with EV's Precision Series sound. With up to 2x1600 watts into two ohms, and 2x1100 watts into four ohms, and only 17.96 lbs (8.15 kg), it is both powerful and lightweight. The CP3000S is state-of-the-art and can be used for any application. It is specifically designed to allow for long-term driving of low loads into subwoofers without stress. The CP3000S's combination of reliability and pleasing, rich sound make it the first choice for all mid and hi-range speaker cabinets.

Manufacturer Name:	ELECTROVOICE
Model:	CP3000S
Part Number:	F01U101201
Channels	Dual Channel
