

REVEAL 502

TANNOY®

The Tannoy Reveal 502 is the next step in the line of professional Reveal Series studio monitors. The powered Reveal 502 monitor s perfectly matched integrated amplifier ensures maximum efficiency and removes any need for a separate power amp. Response is optimized for near-field operation, such as on a meter bridge or on a table on either side of your control surface. Tannoy puts an Independent gain control on the rear panel, along with an HF trim control to allow fine tuning. Reveal 502 brings 67 years of tried-and-true legendary Tannoy sound to your personal studio in a sleekly designed enclosure that brings you pristine audio quality with a truly remarkable feature set. The custom 5" woofer and 1" tweeter tell you exactly what is going on in your mix through the finely tuned active crossover filter. Combine this with a new 100 watt bi-amp module and you get rock-solid bass at any volume.
