

N8000-1500

 **Electro-Voice**

NetMax itself advances to the next level with the N8000-1500. At the heart of the N8000-1500 is the new DSP-2 engine. Composed of three dual-core processors, the DSP-2 expands the total processing power of the N8000-1500 to 1500 MIPS. But it doesn't stop there-the unique modular nature of NetMax's means that each input or output card that is added to a chassis provides an additional DSP engine and another 100 MIPS of processing power. This means that a fully loaded chassis provides 1900 MIPS of processing-almost double the power of the original N8000. Combined with the optional CobraNet interface, NetMax's unique monitoring and supervision options, FIR-Drive, and the multitude of control options provided by IRIS-Net, the N8000-1500 represents the most powerful pro audio processor on the market!

Manufacturer Name:	ELECTROVOICE
Model:	N8000-1500
Part Number:	F01U101305
	Installation
Guarantee	3 Years Guarantee
