

MV212-XV

Full size passive dual 12" 3-way line array element for installation and touring applications. Dual 12" low frequency transducers with lightweight neodymium motors. 1 x 1.4" coaxial neodymium mid-high compression driver. Integral Dendritic waveguides for perfect line-source vertical plane coupling. 790 Watts continuous, 3,160 Watts peak power. 100° horizontal x 0.5-10° variable vertical curvature. Seamless integration with Lab Gruppen amplifiers and Lake DSP for complete system solution. Advanced linear phase FIR hybrid processing for exceptional sound quality. 3-point suspension system with advanced ergonomic design for rapid deployment and ease of use. Suspend up to 16 MV212 elements at 10:1 safety factor. Weather-resistant enclosure construction with durable semi matte black paint finish. Tour grade Neutrik SpeakON\* STX NL4 connectors for input and link.
