

1. Full pure diode RGB laser with more stable performance and longer working life. It can work properly between -30°C and 40°C. 2. Two floors designs, more compacted and much lighter. 1) Top floor: Optical and electric components. Dust proof designs, no maintenance costs. IP51 protection level. 2) Bottom floor: big heat sink floor. Heat dissipation by strong air convection with big radiator. 3. Small laser beam, small divergence angle. 4. Made of analog laser modulation. Users can dimmer the laser brightness linearly to makes the laser light more colorful. 5. Use color LCD display technology, large-capacity TF card. ◆Play Mode: ILDA PC Control, DMX512 (25/18 channels), Sound Active, AUTO, Master/Slave. ◆PC control: Standard DB25-ILDA Laser Control Interface, Optional RJ45-ILDA interface (easy wiring) ◆Safety configure: Single Beam Protection System (can switch ON or OFF; very important for high power laser lights), laser ON-OFF switch, laser remote interlock. ◆Safety intelligent:Force the laser off intelligently when there is a failure of scanning motor or control system which causes a single point. Will shut off laser automatically without trigger signal in master/slave, DMX, PC control modes. ◆Power Supply: 100~250V, 50/60HZ, 50W ◆Applicable to discos, dance halls, bars, nightclubs and various large-scale performance venues. Can operate in a low temperature outdoors. Model Red Laser@638nm Green Laser@520nm Blue Laser@450nm Scanner Size G.W AC02RGB
Power:>350mW Beam dia.: 3.5*5.5mm Divergence:<1.5mrad
Power:>600mW Beam dia.: 3.5*5.5mm Divergence:<1.5mrad
Power:>1100mW Beam dia.: 3.5*5.5mm Divergence:<1.5mrad 25KPPS
