BRAINware

Kramer BRAINware is an enterprise−class, revolutionary, user−friendly, software application that enables you to execute all your room control actions straight from a KT−107 family touch panel, VIA Connect PLUS or KC−BRAINware−5/25/50 without installing a physical brain between the user interface and the controlled devices. Using the power of Kramer Control cloud–based control & space management platform, Kramer BRAINware enables your touch panel to operate multiple devices over Ethernet such as scalers, video displays, audio amplifiers, Blu−ray players, sensors, screens, shades, door locks, and lights. Designed specifically for KT−107 family touch panels, VIA Connect PLUS, and KC−BRAINware hardware platforms, Kramer BRAINware uses custom user interfaces configured in the Kramer Control Builder. Designing a system was never easier, with Kramer Control's programming free, intuitive drag & drop Builder. Install, configure and modify your control system without any prior knowledge in programming. Kramer BRAINware is available as a one−time license.
