

A10i FOCUS

# A10i Focus is the installation version of the A10 Focus, designed for medium throw installation applications. A10i Focus shares identical sonic performance with its touring counterpart but features a sleeker design and streamlined mounting hardware for greater integration. With a tightly-controlled 10° enclosure coverage, the passive A10i Focus boasts an impressive output of 140 dB and ensures projection up to 35 m. Panflex allows users to adapt directivity to the audience geometry and ensures exceptional frequency response stability.
