

TS 200FC

**cameo**  
for lumen beings

Theater Spot with Fresnel Lens and 200 W 6-in-1 LED in Black Housing . Any DJ, band, event organiser or company who considers it important to have the optimum light output combined with an extensive colour spectrum for their stage, podium or lectern, should take a look at the Cameo TS 200 FC. With its mixture of red, green, blue, amber, lime and cyan (RGBALC), the Fresnel spotlight is a genuine all-rounder that, thanks to 200 W and full colour, is able to meet the very highest demands in virtually all lighting situations. This is made possible by a light output of 5,500 lm at 3,200 K and a simulated halogen lamp dimmer response
