

LIVE BUNDLE

50 live sound plugins that will help you recreate the excitement of studio mixes – live on stage. Includes precision tools for EQ, reverb, dynamics and more. From live sound essentials like equalization, compression, delay and reverb, to diverse tools for gating, limiting, de-essing and doubling; from precision plugins designed specifically for vocal processing, to faithful plugin models of vintage hardware gear – the Live bundle gives you what you need to create live mixes that are both pristine and powerful.
